

Evofem Biosciences to Present at Piper Jaffray Healthcare Conference on November 27, 2018

SAN DIEGO, Nov. 15, 2018 /PRNewswire/ -- Evofem Biosciences, Inc., (NASDAQ: EVFM) ("Evofem" or the "Company") announced today that the Company will present at the 30th Annual Piper Jaffray Healthcare Conference, as follows:

Date: Tuesday, November 27, 2018

Time: 1:30 p.m. EST

Location: Kennedy 1 (4th floor), The Lotte New York Palace, New York City

Webcast (live and archive): www.evofem.com in the "Investors" section under "Events and Presentations."

The Company expects top-line data by year-end 2018 from AMPOWER, the second Phase 3 clinical trial of Amphora® (L-lactic acid, citric acid and potassium bitartrate), its lead Multipurpose Vaginal pH Regulator (MVP-R) product candidate, for the prevention of pregnancy.

Assuming positive results, Evofem expects to re-submit the Amphora New Drug Application in the first half of 2019 which, if approved by the FDA, would position the Company to commercialize Amphora in January 2020 as the first and only non-hormonal, on-demand prescription birth control method in the U.S.

Evofem's management team will host one-on-one meetings with investors during the conference. Please contact your Piper Jaffray representative or ir@evofem.com to schedule a meeting.

About Amphora

Amphora® (L-lactic acid, citric acid, and potassium bitartrate) is an investigational non-hormonal gel designed to regulate vaginal pH within the normal range of 3.5 to 4.5. This maintains an acidic environment, which is

inhospitable to sperm as well as certain viral and bacterial pathogens associated with sexually transmitted infections, but is integral to the survival of healthy bacteria in the vagina.

Evoform expects top-line data in December 2018 from AMPPOWER, its Phase 3 clinical trial evaluating Amphora for the prevention of pregnancy. This single-arm, open-label trial enrolled approximately 1,400 women aged 18-35 who are at risk of pregnancy at 112 U.S. centers. The primary endpoint of the study is pregnancy prevention over seven cycles of use.

The Company is actively enrolling **AMPREVENCE**, a double-blinded placebo-controlled Phase 2b clinical trial of Amphora to prevent urogenital acquisition of Chlamydia trachomatis (primary endpoint) and Neisseria gonorrhoea (secondary endpoint) in women. This study is designed to enroll 844 women at approximately 50 centers in the United States for a four-month interventional period and subsequent one-month follow-up period.

The CDC recently reported that rates of chlamydia, the most frequently reported bacterial sexually transmitted disease (STD) in the U.S., and gonorrhoea have climbed for the fourth consecutive year in the United States. Last year, nearly 2.3 million U.S. cases of these STDs were diagnosed, according to preliminary data, an increase of over 200,000 cases as compared with 2016.¹ There are currently no FDA-approved products for either of these STDs.

About Evoform Biosciences

Evoform Biosciences, Inc., (NASDAQ: EVFM) is a clinical-stage biopharmaceutical company committed to developing and commercializing innovative products to address unmet needs in women's sexual and reproductive health. Evoform is leveraging its proprietary Multipurpose Vaginal pH Regulator (MVP-R) to develop product candidates for multiple indications, including prevention of pregnancy, prevention of urogenital transmission of chlamydia and gonorrhoea in women and the prevention of recurrent bacterial vaginosis. For more information regarding Evoform, please visit www.evoform.com.

Forward-Looking Statements

Statements in this press release about Evoform's future expectations, plans and prospects, as well as any other statements regarding matters that are not historical facts, may constitute forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. These statements, include, but are not limited to statements regarding objectives, plans and strategies that address activities, events or developments that the Company intends, expects, projects, believes or anticipates will or may occur in the future; statements about the anticipated results of the Phase 3 clinical trial evaluating Amphora for birth control and the Phase 2b clinical trial of Amphora to prevent urogenital acquisition of Chlamydia trachomatis and Neisseria gonorrhoea in women, and any expected completion dates or general timing for these clinical trials. These statements are often characterized by terminology such as "believes," "hope" "may," "anticipates," "should," "intends," "plans," "will," "could," "would,"

"expects," "estimates," "projects," "positioned," "strategy" and similar expressions and are based on assumptions and assessments made in light of management's experience and perception of historical trends, current conditions, expected future developments and other factors believed to be appropriate. Forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties, many of which are outside of the Company's control. Important factors that could cause actual results, developments, and business decisions to differ materially from forward-looking statements are described in the sections titled "Risk Factors" in the Company's filings with the Securities and Exchange Commission (SEC), including its Quarterly Report for the period ended March 31, 2018, as filed with the SEC on Form 10-Q on May 14, 2018, and include but are not limited to the following: the Company's ability to raise the additional funds necessary to commercialize Amphora as a contraceptive and/or to complete the development of Amphora to prevent urogenital acquisition of Chlamydia trachomatis and Neisseria gonorrhoea in women; the Company's reliance on third parties to conduct its clinical trials, research and development and manufacturing; the availability of reimbursement from government authorities and health insurance companies for the Company's products; the impact of potential product liability lawsuits; the influence of extensive and costly government regulation; the volatility of the trading price of the Company's common stock, and the concentration of power in its stock ownership. Forward-looking statements in this press release are made as of the date of this press release, and the Company undertakes no duty to update or revise any such statements, whether as a result of new information, future events or otherwise. These forward-looking statements should not be relied upon as representing Evofem's views as of any date subsequent to the date hereof. We have included certain information from government publications and general publications and research, surveys and studies conducted by third parties. This information has been obtained from sources believed to be reliable, although they do not guaranty the accuracy or completeness of such information. We have not independently verified market and industry data from any third-party sources.
